

Drawing not to scale. Actual hauling system may vary depending on venue constraints.

Points A and B need to be at least 300mm apart - either side of an RSJ or similar is ideal. Not more than ~ 1 or 2 m dependent on venue height.

Point C should be as close to vertically above D as possible, Ideally both will be off stage.

Ideal height for points is 8m or more. Minimum height is 5m.
